

## KB 020 – Skip client validation

### Reason:

There is validation to make sure that PowerConnect is not setup in client 000, 001 and 066. However, under special circumstances, this validation can be skipped

### Steps:

- Goto SM30 -> Table TPARA -> Click Maintain
- Parameter ID /BNWVS/NO\_CLNT\_TEST -> Click change
- Text = Skip Client Validation -> Click save
- Goto SU01 and find the PowerConnect user
- Goto Parameters tab
- Put in the following

Parameter ID = /BNWVS/NO\_CLNT\_TEST

Parameter Value = X
