

KB 040 - Setup STAD (raw) filter of event

To enable STAD raw events filter the below fields should be enabled as a minimum to get useful metrics

The screenshot displays the 'Administrator' control panel for PowerControl. A dropdown menu is open under 'Setup Metric', with 'Metric filters' selected. This menu further opens to show various filter options, with 'STAD metrics' selected. A sub-menu for 'STAD metrics' is also open, showing 'Raw filter' as the selected option. The background interface includes sections for 'Job Monitoring', 'Batch Parameters When Starting Jobs', and 'Recently Collected Metrics' with a line graph.
