

Authorisation error during connection test

Problem:

- Perform connection test from SAP and the following error is shown

Description:

- User account used to access Splunk does not have permission to check whether sourcetype exists or not
- REST API endpoint accessed is
<url>:8089/services/properties/props/sap_abap

Solution:

- Add capability rest_properties_get to the user

For further information regarding the capability, go to the following link

<http://docs.splunk.com/Documentation/Splunk/latest/Security/Rolesandcapabilities>
