

## KB 020 – Skip client validation

### Reason:

There is validation to make sure that PowerConnect is not setup in client 000, 001 and 066. However, under special circumstances, this validation can be skipped

### Steps:

Please amend the following parameter in the SM30->/BNWVS/CFG table to make it blank:

Global Configuration	
Config Name	Config Value
ARCHIVE_DAYS_TO_RETAIN	3
ARCHIVE_DAYS_TO_RETAIN_UN	14
ARCHIVE_DURATION_RUN	43200
ARCHIVE_UPLOAD_STATS_RETA	30
BUFFER_LOG_DAYS_TO_RETAIN	7
CLIENT_CHECK	
CLUSTER_TRUNCATE	X

Then save and try the /bnwvs/main tcode again.
